Scale Up

KEY FEATURES

JEDI assists JTACs in capturing and tracking currencies and qualification:

- Qualification status can be understood at a glance, eliminating manual counting of various expiration dates.
- JEDI supports JTACs by reminding them of upcoming or expired currencies.
- Tracks all currencies digitally in one place, backing them up.
- Optimized for both desktop and mobile.

JEDI optimizes tracking of JTACs for the leadership in real time:

- PMs can get an up-to-date organization overview from their JEDI home page.
- PMs and supervisors can quickly see the status of JTACs they manage.

JEDI | JTAC Enterprise Data Infrastructure

With JEDI, tracking of JTAC currencies and qualification can be standardized across all nations. This will improve communication within individual nations, and within NATO. JEDI offers a reliable way to access and store data, eliminating the manual work associated with calculating a JTAC's qualification.

The JEDI MVP is a functioning demonstrator able to reliably track Controls, METLs, Designation Letters, and Evaluations.

It is a scalable solution that can be further developed by interested parties: the Innovation Hub is looking for partners from the NATO Command Structure and Allies to cooperate in the short / medium term.

*JEDI is a digital tool to track, access and store JTAC qualification requirements.
Review your qualification status and expiring currencies at a glance.
Easily share your profile with others in your organization.*

TRANSFORMING NATO

ALLIED COMMAND TRANSFORMATION

NATO's Warfare Development Command

Allied Command Transformation defines the future military context, identifying challenges and opportunities in order to maintain a warfighting edge. It ensures maximum interoperability; gives structure and priority to NATO forces through defence planning and capability development; applies innovation to leverage ideas, procedures and technologies to the benefit of our warfare development approaches; and, in all of this, leverages the intellectual horsepower of a large network of industry, academia, military and civilian expertise in nations, in NATO agencies and NATO Centres of Excellence.

Allied Command Transformation is organized around four principal functions:

- Strategic thinking
- Development of capabilities
- Education, training and exercises
- Co-operation and engagement
