NOCMB

Intelligence Collection Management Platform

Intelligence Collection Management is a critical element of NATO JISR capabilities involving several NATO and national entities. The NOCMB, which stands for NATO Operations Collection Management Bridge, aims to increase the efficacy and efficiency of the intelligence collection process by increasing the collaboration of the intelligence community.

The end-to-end solution supports the collection management process from collection requirement creation to the intelligence product evaluation. With the delivery of NOCMB capability, the NATO intelligence community will have a more dynamic and collaborative collection management process supported by an intuitive and user-friendly platform. Delivery of NOCMB MVP will also inform the requirements for a fully developed solution through the Common Funded Capability Development.

KEY FEATURES

- Multiple Entity Collaboration

- Advanced Map Visualization

- User Customizable Views

- Customizable Priority Schemas
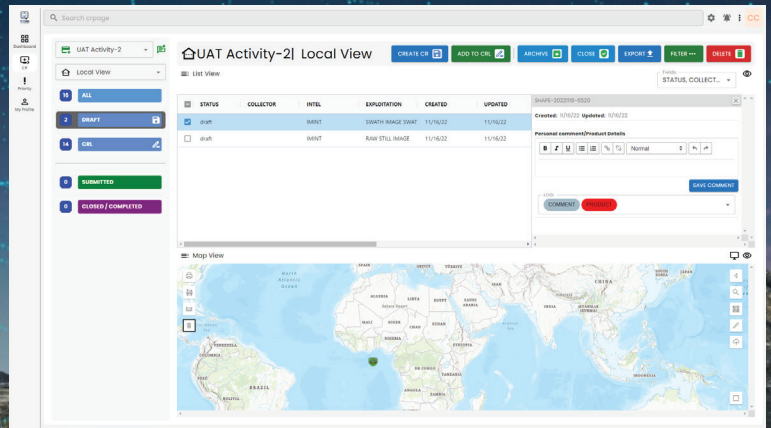

- Multi-Level User Management

NATO Innovation Podcast

NOCMB demonstrates the efficiency of the Open Innovation process. ACT Innovation Branch collaborated with SHAPE, JFC's and SSC's to develop NOCMB. They are now keen to develop its potential further and continue with improvements to the software. NOCMB has showcased over 200 feature improvements to help with the intel-gathering process. NOCMB's flexible structure allows further development to meet additional NATO and national needs.

TRANSFORMING NATO

ALLIED COMMAND TRANSFORMATION

NATO's Warfare Development Command

Allied Command Transformation defines the future military context, identifying challenges and opportunities in order to maintain a warfighting edge. It ensures maximum interoperability; gives structure and priority to NATO forces through defence planning and capability development; applies innovation to leverage ideas, procedures and technologies to the benefit of our warfare development approaches; and, in all of this, leverages the intellectual horsepower of a large network of industry, academia, military and civilian expertise in nations, in NATO agencies and NATO Centres of Excellence.

Allied Command Transformation is organized around four principal functions:

- Strategic thinking
- Development of capabilities
- Education, training and exercises
- Co-operation and engagement
