

*Think Big*

*Start Small*

*Scale Up*

## KEY FEATURES

- Powerful and accurate search feature that provides highly relevant and contextual information from the open internet pertaining to any subject of interest, as well as relevant documents.
- Storing the information found in one tool, as bookmarks in a library, allowing the user to easily return.
- Sending out alerts and notifications for the topics of interest and saved searches, so the user is constantly up to date to newest information.
- Provides a feed to the user of suggested posts or information related to his areas of interest.

## CONTENT LEARNING ALERTS & INSIGHTS REVIEW

The **AI Content Learning Alerts and Insights Review (AI CLAIRE)** is a searchable database of unclassified information pertaining to a vast number of subject matters that scans a wide variety of sources for content.

Unlike searching the world wide web, AI CLAIRE distills relevant information to users in a manner that is easy to scan, and alerts users when new information becomes available about a topic they have expressed interest in.

### ALLIED COMMAND TRANSFORMATION

**NATO Innovation Podcast**

## AI CLAIRE

- ✓ CLAIRE is an MVP that will support the custodian's work by providing him with all the information from open sources to NATO's operational standardization documents and by notifying the custodian of all new relevant information.
- ✓ CLAIRE will assist the Custodian in his process with a mix of push and pull of information.
- ✓ Data will be presented in a structured format, accounting for its relevance and sources.
- ✓ The data sources will be dynamic, not static.
- ✓ The data sources AI CLAIRE will use are unclassified.

AI CLAIRE was designed and developed by the ACT Innovation Hub in partnership with ACT's Data Science Section. The Innovation Hub's mission is to inform NATO capability requirements through Innovation to the Warfighters (ACO) and Warfare Developers (ACT), demonstrating to NATO and Allies what is possible through Open Innovation.
