INNOVATION

Think Big

Start Small

Scale Up

KEY FEATURES

- First NATO operational Cyber Awareness tool

- Continued improvement of ACT's Agile DevSecOps development approach

- ACT delivering an operational Minimum Viable Product to Allied Command Operations

- Delivery will support further cyber awareness concept development and inform requirements for the Common Funded Capability Development

CySAS

Cyberspace Situational Awareness System

NATO Cyberspace — CySAS — Situational Awareness System

VIRTUALLY CHECKING YOUR SIX

Threats in cyberspace are becoming more frequent, sophisticated, and destructive, with consequences that extend far beyond the virtual. ACT continues to monitor the cyber threat terrain and contribute to NATO's continued efforts to strengthen its cyber defence posture. Cyberspace Situational Awareness is critical to political and operational decsion-making. The ongoing development of the Cyber Situational Awarness System (CySAS) MVP connects the NATO Strategic Commands, NATO organizations and industry experts in this rapidly advancing field. Delivery of this MVP will both inform requirements for a fully developed solution through the Common Funded Capability Development and also support further the development of the NATO Cyber Situational Awareness Concept.

NATO Innovation Podcast

NATO will continue to adapt to the evolving cyber threat landscape. Through its key features, CySAS will allow NATO to adapt to the evolving cyber threat landscape. The Alliance needs to be prepared to defend its networks and operations against the growing sophistication of the cyber threats and attacks it faces.

TRANSFORMING NATO

ALLIED COMMAND TRANSFORMATION

NATO's Warfare Development Command

Allied Command Transformation defines the future military context, identifying challenges and opportunities in order to maintain a warfighting edge. It ensures maximum interoperability; gives structure and priority to NATO forces through defence planning and capability development; applies innovation to leverage ideas, procedures and technologies to the benefit of our warfare development approaches; and, in all of this, leverages the intellectual horsepower of a large network of industry, academia, military and civilian expertise in nations, in NATO agencies and NATO Centres of Excellence.

Allied Command Transformation is organized around four principal functions:

- Strategic thinking

- Development of capabilities

- Education, training and exercises

- Co-operation and engagement
